6-12 months  
(depending on  
experience)

**Delivery:**  
Online + Unlimited  
Phone Sessions

**Nationally  
Recognised:**  
Yes

## Who is this course for?

If you are a Supervisor, Foreman, Project Manager, or Civil Construction Manager, you can gain further skills in coordinating workplace teams, projects, management, and estimating!

### Here's what one of our students thinks...

"GTI is flexible with its time and did all they could to ensure I had the support

I have been actively employed in the civil industry for over 10 years straight now so most of the subjects were second hand to me. I did however enjoy learning about road design again as I hadn't done them for a few years."

Sam Clatworthy

### Here's what one of our students thinks...

"I think the course was an accurate reflection on what I've been doing for the last 6 years and confirmed the policies and processes relating to the workforce/workplace were relevant.

I would very much recommend the training to others as a method of formally recognizing what they already do and to qualify them for future employment at a higher level!"

Gary Shakespeare

## Where can this course take you?

During this course you will discover and implement practical strategies that will make a REAL difference to managing civil construction plans; environment, quality, risk, safety systems  
Improving safety and compliance to systems on job sites, delivering Projects 'on time' and 'in budget and improving your teams effectiveness.

With infrastructure projects at an all time high and being pulled forward by governments, having your qualifications allows you to stand out from the crowd and gain a higher level position.
